

ENET Insights
Newsletter, January 2019

Welcome to Ethernity's first newsletter!

With the rapid growth and ever-present changes to our market, we feel it is important to provide regular updates along our mutual journey. In this quarterly newsletter, we will share market insights, news and views from Ethernity, and opportunities for us to meet and share.

We hope you'll enjoy the content we provide and find it useful. If you have feedback, questions, or suggestions, please feel free to pass them along to us at liorm@ethernitynet.com.

We look forward to having you with us for the ride.

All the best for a happy and successful 2019,
Lior Mishan,
Head of Marketing

Market Intelligence

It's All About Edge Virtualization

How to accelerate Telco NFV deployments with DPDK and SmartNICs, delivered by Ethernity and Aricent.

Ethernity Perspective

Blog: The Big Trends of 2018 and 2019

What do you think were the biggest telecom trends in 2018, and what will we see in 2019? Compare your thoughts with ours as we take a look at three trends that we believe are dominating the industry.

Whitepaper: Enabling the Virtualized Edge with FPGA SmartNIC Data Acceleration

Implementing FPGA-based SmartNICs offers scalable, deterministic performance with very low latency at a fraction of the space, power, and overall cost, overcoming the unique challenges of the virtualized network edge.

Upcoming Events

MWC 2019 Barcelona

This year's theme is Intelligent Connectivity, which is an area in which we excel. Our FPGA-based smart products and solutions are ideal for connecting and accelerating your network.
